

Wales.

The company discovered the Sorpresa gold and silver deposit and in 2014 delivered a JORC resource of 6.4 million ounces grading 0.61 g/t gold and 38 g/t silver for circa 250,000 ounces of gold equivalent.

Importantly, subsequent exploration has provided evidence that the "Wider Sorpresa Area" is now considered a significant gold mineralised system of some potential.

More recently, multi-billion dollar Canadian producer New Gold Inc. (TSE:NGD) signed an earn-in agreement with Rimfire over its Fifield tenements.

New Gold has committed to spend A\$2 million during 2017 subject to conditions and may choose to spend up to \$12 million within 5 years to earn up to a 70% interest in Rimfire's Fifield tenements.

## Analysis

Drill results continue to confirm the potential that the Sorpresa gold and silver deposit has to grow and be part of a larger future mining operation.

The current main Sorpresa strike line containing gold and silver mineralisation is 1.5 kilometres in length and drill results continues to support the notion that discovery upside exists within the larger 7x2 kilometre Sorpresa Corridor.

Sorpresa represents proof-of-concept that greenfields high grade gold-silver deposits can be found at Fifield, previously undetected, and at surface.

The project's potential has been supported by the recent farm-in by Canadian gold producer, New Gold, who is already familiar with the wider area as it operates "The Peak" mine at Cobar.

The interest in the Fifield area is drawn through the geological similarities to New Gold's New Afton gold-copper-silver mine in Canada.

This confirms Rimfire's view that Fifield is within the LTZ, and is the right location for world class discoveries.

Rimfire remains leveraged to exploration news flow over the short term as it is expecting to report progress on pre-drilling exploration plans with New Gold in the near future.

Rimfire shares are up 90% over the past 12 months, currently trading at \$0.025.
