Red River Resources on track to commence production from Far West deposit

Red River Resources Ltd (ASX:RVR) is on track to commence production from the Far West deposit in Q3 CY2019 as development continues to progress on schedule.

The Far West deposit is Red River's second underground mine at the Thalanga Operations in Queensland.

To date, more than 3,500 tonnes of high-grade development ore from Far West has been delivered to the Thalanga Operations ROM Pad.

Far West development ore on Thalanga Operations ROM Pad

The company plans to treat this ore as a single parcel through the mill to enable the metallurgical performance of the ore to be optimised.

Red River managing director Mel Palancian said the company was excited to be gearing up for production to commence at Thalanga's second deposit, having achieved record production from the existing deposit, West 45 in the December 2018 quarter.

Red River's contractor PYBAR mined 96,000 tonnes of ore from West 45 during the period.
