Castillo Copper confirms 'very exceptional results, very high grade mineralisation'

Alan Armstrong, executive director of Castillo Copper Ltd (ASX:CCZ), speaks to Proactive Investors about the first batch of assay results received from five holes of an ongoing 39-hole drill program on the Cangai Copper Mine project in NSW, Australia. The results confirm extensive massive sulphide mineralisation across the majority of holes completed; with intersections including 11 metres at 5.94% copper, 2.45% zinc and 19.13 g/t silver from 40 metres including 1-metre grades of up to 10.25% copper, 6.04% zinc and 32.5 g/t silver. A range of survey and sampling work is also ongoing. Armstrong says, "this is very high grade mineralisation. As we look over the last 12 months there's very few other results that have come through like this, across the broader sector let alone on the ASX."
