metres.

Tietto's drilling results were an encouraging trend for the company as it encountered high-grade gold mineralisation, with Wang reporting they had extended mineralisation by up to 130 metres in places.

The company had **discovered a gold-rich Abujar Potoco Prospect (APP)** zone at the project in July 2019, parallel to the Abujar resource.

A fresh rock sample from APP returned a 50.8 g/t gold grade from an elevated gold zone.

Tietto had \$4.86 million cash at the end of June 2019 and was expected to bank \$600,000 from a placement and \$1.39 million from a Hong Kong Ausino Investment Ltd subscription facility after financial year end.

The proposed funds injection followed an announcement of a capital raising this year that was **approved by shareholders** as \$7.6 million in July 2019.

Previous commercial partner Ausino had agreed to cover costs of up to \$2 million in exchange for shares.
