## Kin Mining commences 10,000-metre drill program at Cardinia to follow up 895 g/t sample

Kin Mining NL (ASX:KIN) has commenced a drilling program at its flagship Cardinia Gold Project (CGP) in Western Australia.

The 10,000-metre program will comprise aircore and reverse circulation (RC) drilling and target six key areas located within five kilometres of the processing plant site.

The targets are prospective for gold-rich volcanogenic massive sulphide (VMS) mineralisation and epithermal vein-hosted gold mineralisation.

The targets are a result of exploration that included rock chip sampling which returned grades of up to 895 g/t gold.

The majority of the drilling will be aircore with RC drilling to target the Snowden Well prospect.

## Adding gold resources can increase project economics

A pre-feasibility study (PFS) for the Cardinia Gold Project valued a future gold mining operation at up to \$118 million.

By delineating high-grade gold resources near the proposed processing plant site, Kin can potentially increase this valuation.
