

Well workover

A workover rig was mobilised to Tangai Sukanati in December to perform a workover program on the Bunian 4 location.

The goal is to remove a downhole obstruction preventing the production of well fluids with the well brought back into production from the TRM 3 oil zone, which should add to the total production capacity.

This rig will then move to complete the remaining well work including the Bunian 1 and Tangai 3 pump repairs.

The workover program will conclude with the Tangai 4 conversion to water injector

Pilot trial

Tangai 4 well will host the field pilot for the Smart-Water injection trial in the current quarter.

This trial is targeting an increase in field recovery via the injection of tailored low salinity water to improve oil recoveries.
