### Placement and extension of debt facility

The company has recently secured A\$45.4 million in additional funding to support rapid development of the Lake Way Sulphate of Potash (SOP) Project in Western Australia.

This included the A\$23.5 million placement which was well supported by a number of new Australian institutional investors and existing institutional shareholders and extension of a debt facility with Taurus Funds Management by a further US\$15 million (~A\$22 million).

### Approved by shareholders

Participation by company directors in the placement was approved by shareholders.

Salt Lake Potash has a market cap of approximately A\$188.2 million and last traded at A65 cents.

The funds raised are supporting construction of key infrastructure for the Lake Way project.

### "Rapid construction"

In announcing the capital raising results, Swierczuk said: "Our close working relationship with Taurus has enabled SO4 to extend the Stage 1 Debt Facility whilst we complete documentation and satisfaction of conditions precedent for the main Project Development Facility.

"Along with the placement funds, the extension to the debt facility enables us to continue the rapid construction at Lake Way in line with our project schedule."

This includes construction of stage II on-lake infrastructure and start of site works for the process plant in early 2020, along with ongoing exploration of other lakes and general working capital.
