Full interview: Alkane Resources hits almost 700 metres of mineralisation in follow-up drilling at Boda discovery

Alkane Resources Ltd (ASX:ALK) managing director Nic Earner updates Proactive on follow-up drill results from the Boda prospect within the wider Northern Molong Porphyry Project (NMPP) near Orange in New South Wales.

The drilling is part of a 5,000-metre diamond core drilling exploration program designed to test depth and strike extensions to the broad porphyry gold-copper mineralisation returned in the discovery hole.

Earner said: "Hole-5 has hit just under 700 metres of mineralisation returning 0.46 g/t gold and 0.19% copper.

"The exciting thing is that it shows consistency with depth - and that is what shareholders are looking for."
