### **Resource modelling**

Open-pit mining at Riverina is scheduled to begin in quarter four 2020 as two separate open pits, spanning an area of 1,000 x 350 metres, to a depth of up to 110 metres below the current ground surface.

The detailed mining study for the Riverina project area was incorporated into the Davyhurst Project DFS.

Future resource modelling and estimation work will determine the mining potential of the deposit.

Quinlivan said: "We look forward to better defining the mining potential in these areas and assessing how potential mining operations might be incorporated into our future mining plans for this area."

Resource modelling is now underway with resource estimation work now scheduled to conclude in September 2020.
